# pleasetakes v2

Software Update

Build: *2010-08-18*

Update: *#0001*

Affected Assemblies: *Core, Cover*

Update Type: *Routine bug fixes/Improvements*

Not much of an update from a front-end point of view, but worth mentioning nevertheless. Several aspects of the Core and Cover assemblies have been refined, and as a direct result of this refinement work, a slight speed improvement should be noticed, especially in more resource-intensive tasks.
